

Non-Instructional Operations

Bus Safety

Bus Cameras

In order to enhance bus safety for our students, the Board of Education may order the installation of cameras on buses to promote desired student behavior, provide safety training for bus drivers, and to permit drivers to concentrate their attention on the safe operation of buses.

The following procedure shall be used regarding these cameras:

- 1) All digital media will be considered confidential and is to be viewed only on an "as needed" basis as determined by the school administration. Potentially, digital media may serve as an aid in assessing student behavior and may be viewed by the administration, the transportation contractor, or police.
- 2) Digital media not necessary for ensuring appropriate behavior will be overwritten after 7 days.

NOTE: All digital media are the property of the Brookfield Public Schools which has exclusive jurisdiction of their use.

Policy
