

Community Relations**Educational Foundations**

The Board recognizes that members of the community are often willing to make voluntary contributions that shall provide needed additional funds and resources for the District. The Board, therefore, approves and encourages the creation of independent educational foundations to actively raise funds and provide resources that shall enhance educational opportunities for District students.

The Board shall work cooperatively with these foundations in determining the purpose for which funds may be used equitably to meet the changing needs of the District and its students.
