

Construction

Responsibilities

The responsibilities of the Board of Education in a building project include but are not limited to taking the following major actions:

1. Long range planning for the entire school system.
2. Determining specific project needs.
3. Establishing specifications for specific projects.
4. Providing an informational program on school needs for local officials and the public.
5. Approving drawings and specifications for construction.
6. Approving and accepting completed projects.

Policy adopted: 10/15/03
