

## Students

### Search and Seizure

#### Breathalyzer Testing — Regulation

Given reasonable suspicion of alcohol consumption by a student, or if the student fails the initial passive screening, the administration will follow these procedures:

- The student will be removed to the office area for observation and questioning concerning alcohol consumption.
- The student may at any point confirm or deny the report of possible alcohol consumption.
- After a fifteen minute waiting period, the student will be informed of the passive alcohol sensor test and how it operates. The student will be requested to breathe across the intake part of the device.
- The administration will then inform the student of the device's findings – alcohol was either detected on the sensor or the sensor did not detect alcohol.
- If alcohol was detected, the administration will request that the student take an active breathalyzer test.
- If the student continues to deny consumption or refuses to take the active breathalyzer test, or tests positive on the active breathalyzer test, the student will be disciplined according to Brookfield discipline/punishment policy.
- The student's parents will be informed of the disciplinary actions to be taken.

In addition, the administration will:

- Publicize the intent and procedure with parents/guardians.
- Hold student meetings to present and clarify the intent and procedure.
