

InstructionStudent Publications

The Board of Education encourages the use of school-sponsored publications for students to express their viewpoints. They shall be free from all policy restrictions outside of the normal rules for responsible journalism (the avoidance of libel, obscenity, defamation, false statements, or material advocating racial or religious prejudice and plagiarism). Student publications shall provide as much opportunity as possible for the expression of all student opinions.

The building administrator has final editorial authority over the content of all student publications.
