Sex Offender Notification

Although the Board assumes no duty beyond that which is required by law, whenever information is received from local law enforcement officials that a registered convicted sex offender is residing within the school district, relevant posting of such information, as determined by the Superintendent, shall be disseminated to individuals or groups of individuals who, in the opinion of the Superintendent, have a legitimate need to be notified of such information in order to protect the health, safety or welfare of school district students while in school or participating in school-related activities.

The Board believes that cooperation with local law enforcement officials will best promote and protect the safety and well being of its students.

No action or inaction with respect to any matter covered or considered by this policy shall be deemed to be a substitute for the diligence and protection required of parents/guardians.
