Student Sports – Concussions

The Board of Education recognizes that concussions and head injuries are commonly reported injuries in children and adolescents who participate in sports and other recreational activities. The Board acknowledges the risk of catastrophic injuries or deaths are significant when a concussion or head injury is not properly evaluated and managed.

Only coaches holding a permit issued by the State Board of Education who have completed an approved initial training course regarding concussions and subsequent review of current and relevant information on this topic and required refresher courses shall be permitted to coach intramural and/or interscholastic athletics for the District.

The District will also utilize protocols developed by the State Board of Education in consultation with the Commissioner of Public Health, the Connecticut Interscholastic Athletic Association (CIAC), and appropriate organizations representing licensed athletic trainers and county medical associations to inform and educate coaches, youth athletes and their parents and/or guardians of the nature and risk of concussions or head injuries, including the dangers associated with continuing to engage in athletic activity after a concussion, of the proper method of allowing a student athlete who has sustained a concussion to return to athletic activity.

Annually the District will distribute a head injury and concussion information sheet to all parents/guardians of student participants in competitive sport activities. The parent/guardian and student must return a signed acknowledgement indicating that they have reviewed and understand the information provided before the student participates in any covered activity. This acknowledgement form must be returned and be on file with the District in order for the student to be allowed to practice or compete in the sports activity.

All coaches will complete training pertaining to the District's procedures.

The required refresher course regarding concussions shall include, but not be limited to, an overview of key recognition and safety practices, an update of medical developments, current best practices in the field of concussion research, and prevention and treatment. Said refresher course shall also contain an update on new relevant federal, state and local laws and regulations, and for football coaches, current best practices regarding coaching the sport of football, including, but not limited to, frequency of games and full contact practices and scrimmages as identified by the governing authority for intramural and interscholastic athletics (CIAC).

The District, after January 1, 2015, shall implement the "*Concussion Education Plan and Guidelines for Connecticut Schools*," developed by the State Board of Education per the stipulations of P.A. 14-66. Written materials, online training or videos, or in person training shall address, at a minimum, the recognition of signs or symptoms of concussion, means of obtaining proper medical treatment for a person suspected of sustaining a concussion, the nature and risks of concussions, including the danger of continuing to engage in athletic activity after sustaining a concussion, proper procedures for return to athletic activity and current best practices in the prevention and treatment of a concussion.

The Board recognizes that commencing July 1, 2015, the CIAC prohibits student athletes from participation in any intramural or interscholastic activity unless the student athlete and his/her parent/guardian completes the concussion education plan of the State Board of Education and its contributing organizations to such plan.

Students

Student Sports – Concussions (continued)

The District, commencing July 1, 2015, will utilize the consent form developed or approved by the State Board of Education with parent/guardians of student athletes in intramural or interscholastic activities regarding concussions. This form shall provide a summary of the concussion education plan developed or approved by the State Board of Education and a summary of the Board's policy regarding concussions. The consent form shall be returned to the appropriate school authorities, signed by the parent/guardian, attesting to the receipt of such form and authorizing the student athlete to participate in the athletic activity.

Further, in compliance with applicable state statutes, the coach of any intramural or interscholastic athletics shall immediately remove any student athlete participating in intramural or interscholastic athletics who (1) is observed to exhibit signs, symptoms or behaviors consistent with a concussion following an observed or suspected blow to the head or body during a practice, game or competition, (2) is diagnosed with a concussion, or (3) is otherwise suspected of having sustained a concussion because such student athlete is observed to exhibit signs, symptoms or behaviors consistent with a concussion regardless of when such concussion or head injury may have occurred. Upon such removal, the coach or other qualified school employee defined in Connecticut General Statutes 10-212a, shall notify the student athlete's parent/guardian that the student athlete has exhibited such signs, symptoms, or behaviors consistent with a concussion or has been diagnosed with a concussion. Such notification shall be provided not later than twenty-four hours after such removal. However, a reasonable effort shall be made to provide such notification immediately after such removal.

Prior to medical clearance, the coach shall not permit such student athlete to participate in any supervised athletic activities involving physical exertion, including, but not limited to, practices, games or competitions, until such student athlete receives written clearance to participate in such supervised athletic activities involving physical exertion from a licensed health care professional* trained in the evaluation and management of concussions.

The Board, as required, for the school year beginning July 1, 2014 and annually thereafter, will collect and report to the State Board of Education all occurrences of concussion. The report shall contain, if known, the nature and extent of the concussion and the circumstances in which it was sustained.

Concussion Education will take place at each pre-season parent student athlete and coaches meeting. Parents who do not attend will have to watch the concussion in sports video and hand in the completed certificate in order for their child to participate in athletics.
