

🐾 Spanish at Center 🐾

Kindergarten

Students started the year learning numbers 1 to 10, weather and Colors (red, blue, green, yellow and orange). Students did presentations on school objects, and sorted and counted them by size and color. We also had fun practicing the traditional *Chocolate* clap song.

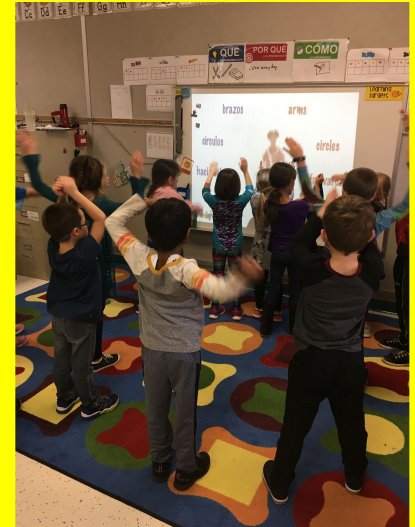

A good way to review the content at home, is to play games, hear songs online, and complete exercises. Please, click on the link below to go to my website. The Review Unit and Unit 1 have material that has been covered so far in the year.

1st Grade

I was so glad to see all the students back after the summer! We got some great new students as well. All classes reviewed the content from last year and had fun dancing to some new songs.

Students now can tell you the colors (up to 9), numbers 1-20, and how is the weather today. They can also tell you what materials they need for school.

For practice at home, please check the link below, that will bring you to my school website. It has Plenty of games and fun exercises. Review Unit and Unit 1 have the content we have covered so far. Unit 2 is the current working Unit.
